LOCAL: implementation kept on device
CLOUD
Task workspace
buggy code, docstrings and visible tests
Interface extractor
signatures, docstrings, type fields; privacy check; no function bodies
interface
Cloud reviewer
writes contract tests OR a rule checklist
edits
tests / checklist
Post-run scoring
original visible tests + hidden evaluation
Local builder
Gemma edits code; runs available checks
Review intake
static test validation OR append checklist
Hidden evaluation is never shown to either model.
